

Creating an Account

Go to www.blinklearning.com. Click on the **Create account** button.

Registration

These registration steps must only be completed when a user is creating an account for the first time.

1. Enter the **Class code** provided to you by your teacher. This number always begins with “CL.”

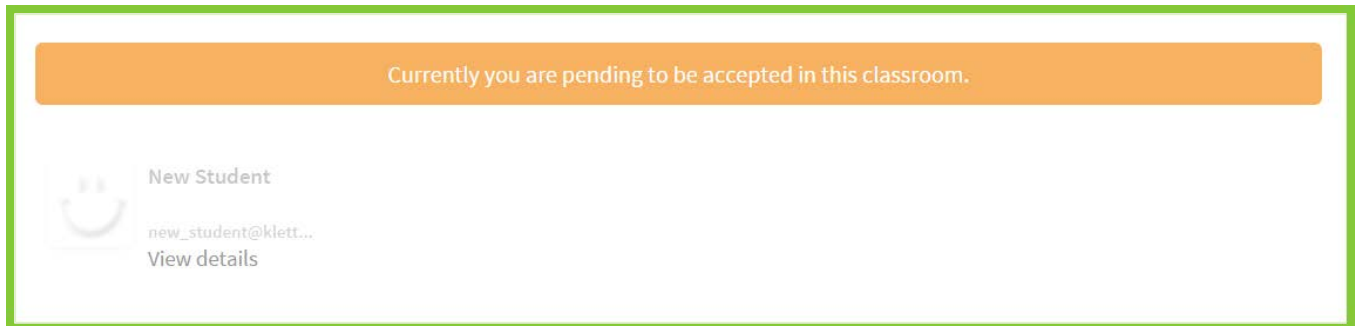

It is important that you enter a **Class code** (not a Book Code) in the registration form.
2. Enter your e-mail address. **Be sure to proofread it.** This will be your user name.
3. Enter your First and Last names, create a password, and enter your age.
4. Read and accept the Data Protection Policy and then click on **Register**.

Joining a Classroom - New Student

Setting up a new account will bring you automatically to the main menu.

Click on **My classroom** to view your section. You will see the following message.

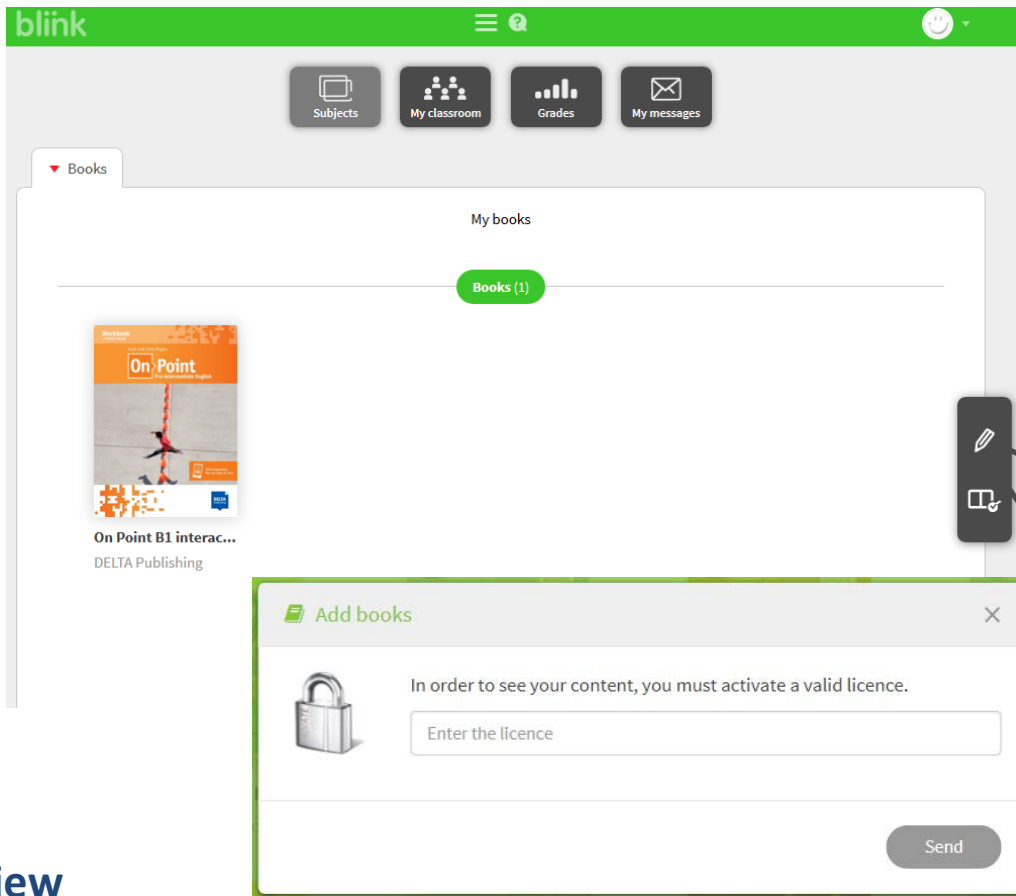

You must wait for your teacher's confirmation to proceed to the classroom functions.

Note: You will be able to see a demo version (up to 3 open chapters) of each book even prior to your teacher's confirmation. To have full access to your books, you must activate a valid **Book Code**.

Add Content (Books)

Once you have a **Book Code**, follow these steps to view the entire product:

1. Select **Subjects**.
2. Click on the **Add books** button in the toolbar on the right side of the screen.
3. Enter the valid **Book code** (license) for each book you will be using this semester.

Pro Tip: write your **Book code** somewhere safe, e.g., in a folder or notebook. This is useful should you need account support in the future.

Review

You should have

1. created an account with a **Class code** given to you by your teacher.
2. activated a valid **Book code** for each product you will be using this semester.

Have fun learning with DELTA Publishing!
